Engaging activities...

To keep your kids learning and having fun this summer

1

Word Hunt: Create a word list. Write each word on a sticky note and hide them around the house. Each time your child finds a word have them read the word to you. Advance-have them create a sentence when they find the word.

2

Outdoor Memory: Write math facts or words on paper plates. Place them in your yard face down. Have your child flip a plate and try to find it's match.

3

Decode the Secret Message: Create a secret message. Use math facts that correspond with the letter of the message.

Example Secret Message: *Summer Fun.*

Math fact $3 \times 4. 12 = S$

4

Math Fact Card Game: Using a deck of cards flip two cards over. For example, 3 & 5 would be 3×5 . The first player to say the answer gets both cards. The player with the most cards when the deck is finished is the winner.

5

Secret Word Jar: Fill a jar with different words. Have your child pick a word each day and keep it a secret. Then challenge your child to use it in conversations throughout their day. See if they can get someone to guess when they use the word.
